Webinar in cooperation with the EOSC CZ Training Centre: An Introduction to the Research Activity Identifier (RAiD)

Eva Karbanová

September 23, 2026

**Co-funded by
the European Union**

Ministry of Education,
Youth and Sports
of the Czech Republic

Program of this webinar

1) The National Centre for Persistent Identifiers

2) Research Activity Identifier:

Matthias Liffers: RAiD introduction

Product Manager for RAiD at the Australian Research Data Commons (ARDC)

Marek Cebecauer: RAiD identifier and the AMULET project

Research group leader at the J. Heyrovský Institute of Physical Chemistry (CAS)

David Novák: RAiD and its potential benefits and challenges from the perspective in their field

Head of the Department of Information Resources and Landscape Archaeology at the Institute of Archaeology (CAS, Prague)

3) Expression of Interest in RAiD in Czechia

4) Q&A

National Centre for Persistent Identifiers

- Operating since January 1, 2023, as a department of the National Library of Technology
- Activities funded by the CARDS* project for 2023–2028 (a follow-up project is planned)
- Provides **administrative, coordination, methodological, and financial support** for the implementation and use of persistent identifiers (PIDs) compatible with European and international standards:
 - **National ISSN Centre** (newspapers, journals)
 - **National ORCID Centre** (individuals – researchers)
 - **National DOI Centre** (research outputs, grants)
 - **National ROR Support** (research organizations)
 - **RAiD Implementation Support** (research activity/project identifier)

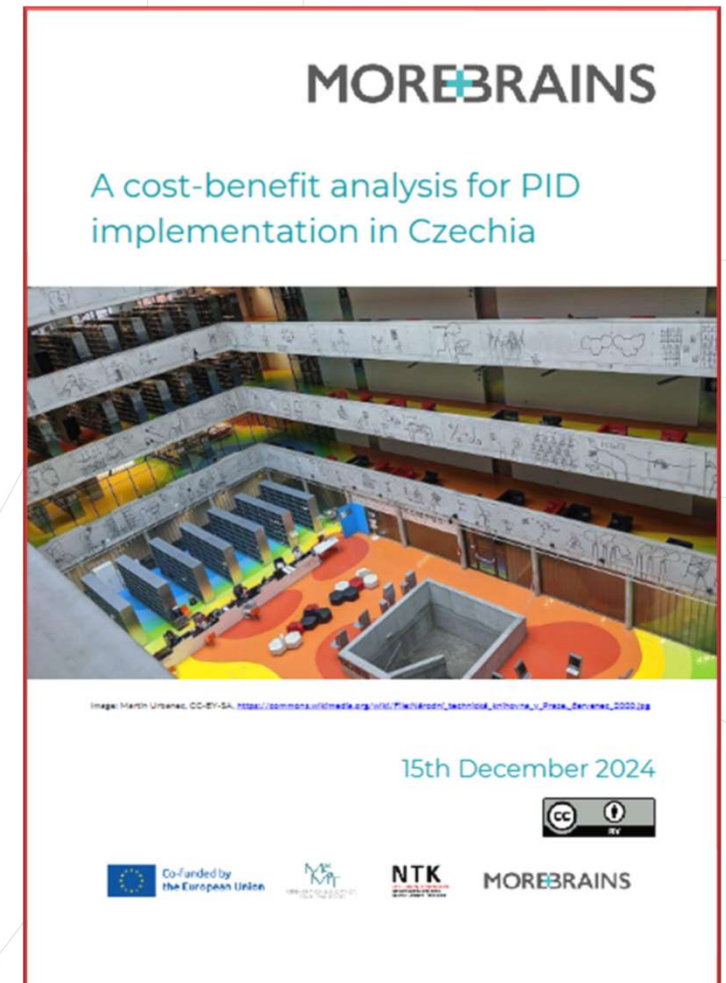

*CARDS (Czech Academic and Research Discovery Services) – individual systemic project within the Jan Amos Komenský Operational Programme

Why are we talking about RAiD?

- National PID Centre commissioned a **cost-benefit analysis for PID implementation in Czechia in 202**^{HH0}
- **RAiD was identified by the analysis as one of the 5 priority PIDs** that have the highest potential to save^{HH1} time of Czech researchers and research administrators if fully implemented
- Therefore, the National PID Centre is closely monitoring international development of RAiD and wants to work towards its introduction into the Czech research landscape

Snímek 4

- HH0** Tohle bych vyhodila, o tom bude mluvit Matthias
Hana Heringová; 2026-09-17T18:26:59.068
- HH1** Tohle zní poměrně sebevědomě, jakože si NTK nechala udělat analýzu a pouze na jejím základě my tvrdíme, že RAiD je národní priorita
Hana Heringová; 2026-09-17T18:30:01.523
- HH2** To si myslím, že je taky trochu předčasné, teď nic neintegrujeme, teď se snažíme vůbec vymyslet, jak bychom mohli v ČR RAiD začít přidělovat a jestli to za to stojí...
Hana Heringová; 2026-09-17T18:41:19.046

Interested in RAiD?

Shape the future of RAiD in Czechia: you can express your organization's interest in early testing of RAiD.

Filling out the expression of interest form is non-binding.
